

Identifying Spheres of Earth

Name: _____ Date: _____

Look for examples of the geosphere, biosphere, atmosphere and hydrosphere as you observe your environment in the outdoor classroom.

Helpful Hints:

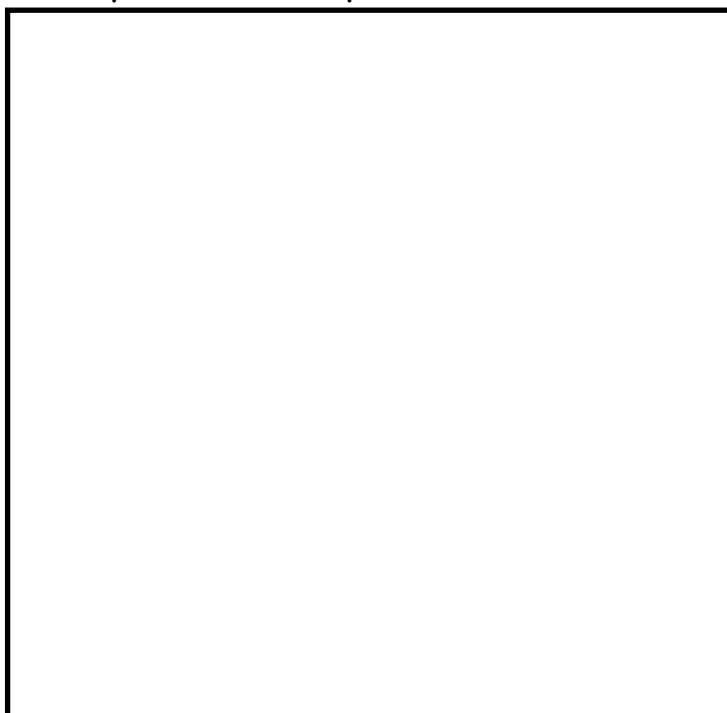

Atmosphere - the envelope of gases (or air) surrounding the earth.

Hydrosphere - all of the water surrounding the earth including on land and in the air.

Biosphere - all of the living organisms on earth and their environments.

Geosphere (also called **Lithosphere**) - the solid part of the earth consisting of rock, dust, soil, and related material.

Now draw a picture of your outdoor classroom below including at least one example of each "sphere".

What represents the **geosphere**?

What represents the **atmosphere**?

What represents the **hydrosphere**?

What represents the **biosphere**? _____
